

### Digital Battery Tester

Designed specifically for testing zinc air hearing instrument batteries, this unit also has a convenient built-in compartment for storing two spare batteries. Compact design perfect for purse or keychain use. No battery inside needed to function and uses only 0.3mA for each test.

52631-R \$4.95

### Envirocide

Ready to use and versatile disinfectant/decontaminant. Envirocide is biodegradable and cleans and disinfects without glutaldehyde, phenols, or bleach. Kills TB, HIV- 1, and many other pathogens. Safe for use on almost anything, effective for ultrasonic use and as a presoak cleaner prior to sterilization.

40184-R 1 qt. \$8.50  
40185-R 1 gal. \$23.00

### Hearing Aid Saver™

Moisture removal system for hearing instruments and other small moisture-sensitive items. Drying crystals are easily reactivated in microwave. Handy for nightstands and travel. Standard or mini.

50551-R standard individual \$4.35  
50552-R mini individual \$4.35  
50561-R standard 12 units \$46.00  
50562-R mini 12 units \$46.00

### Air Blowers

Bulb syringe with pinpoint release helps remove moisture from earmold tubing.

50571-R individual \$3.75  
50572-R 12 units w/display \$40.00

### Sporox II

Powerful hydrogen peroxide formula for the sterilization and high level disinfection of heat-sensitive instruments. Sporox is virucidal, sporicidal, tuberculocidal, bactericidal, and fungicidal. And unlike glutaraldehydes, it oxidizes away debris quickly and effectively at room temperature. Safer for soft metal instruments containing brass or copper.

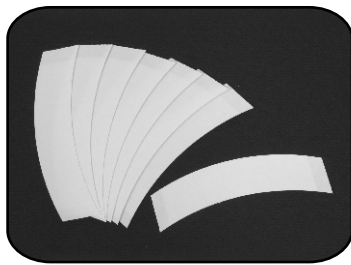

40188-R \$27.00

### Oto-Ease®

Earmold lubricant makes earmold and hearing instrument insertion easy and comfortable and helps ensure a better fit. Perfect for any custom-fit product for the ear. Water soluble and non-staining, safe and convenient. Available in half ounce dropper vials or new single-use packs.

54015-R ½ oz. bottles (12) \$21.50  
54017-R 100 packets \$10.00

### 3M Double Sided Clear Contour Strips

Individuals with very soft ear cartilage may find it difficult to keep a BTE hearing instrument in place behind the ear. This micro-thin, double sided, medical quality adhesive strip placed between the hearing instrument and the head will assist in holding the device in place. Packaged in quantities of 12 or 36 pieces.

42431-R 12 pieces \$2.50  
42432-R 36 pieces \$6.50

### Battery Holders

Ensure your patients always have a fresh battery on hand when the old one wears down. Priced to give away with each instrument sold. Available in either white or yellow. Two sizes hold either two or three batteries. Custom printing with your name and phone number also available (call for special pricing).

52651-R thru 52656-R qty 50 \$.69 ea.  
52661-R thru 52666-R qty 500 \$.64 ea.

### SiliClone®

A full line of cartridge impression materials for use in any manual impression gun or electric system. Choose from original SiliClone or SiliClone Firm, which offers viscosity comparable to our manually mixed Pink Silicast. SiliClone is available in both the traditional 48ml cartridge and new S-50 cartridge, which better prevents early contact between the base and catalyst. SiliClone Firm is only available in the S-50 cartridge.

Order individually or in packs of eight, with or without mixing tips. Call for quantities and pricing.

Everything a patient needs to get started in effective cerumen management. The kit includes ½ ounce cerumen removal drops, soft rubber earwash syringe and instruction brochure for the patient.

54151-R \$3.95

**Wax Catchers**

Gold Wax Catchers provide excellent wax retention and are non-corrosive and non-allergenic. Made of 302 stainless steel wire and coated in 24 kt. gold, wax catcher springs are easily installed and replaced. Available in three sizes.

50116-R tall \$0.30  
50117-R standard \$0.30  
50118-R short \$0.30

**Ear Band-Its™**

Neoprene headband holds swim plugs in and helps keep water out of the ears. Initially developed for children with ear tubes, now demanded by water enthusiasts of all ages who have swimmers ear, perforations or simply do not like to get water in their ears. Available colors include blue, purple, raspberry, red, turquoise. Available in three sizes.

54111-R thru 54135-R \$8.50

**Oto-Care™ Kit**

The essential items every hearing instrument owner requires. Kit contains Hearing Aid Saver, Oto-Ease, Air Blower, 2 ounce Disinfectant/Cleaner, battery tester, telephone pad, wax removal tool and convenient storage pouch.

50111-R \$18.95

**Miracell™**

Unique blend of highly concentrated natural plant extracts relieves itchy ears and acts as a lubricant. Also softens wax buildup so ears clean themselves naturally. Boxed individually in 1/2 ounce bottles or in a display box of 12 bottles.

54025-R individual \$6.95  
54026-R 12 units w/display \$81.00

**Oto-Probe II**

Designed specifically for the hearing healthcare professional. A great value earlite with bright Krypton bulb.

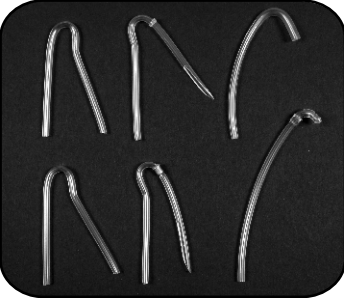

24101-R \$8.35  
24105-R replacement bulb \$1.75

**LED Lenser**

Super-bright LED earlite provides a beam of light like no other. The "cold burning" LED is rated to provide over 100,000 hours of light! Comes complete with batteries and two earlite tips (standard and PROS) for immediate use.

24106-R \$19.95

**Earmold Tubing**

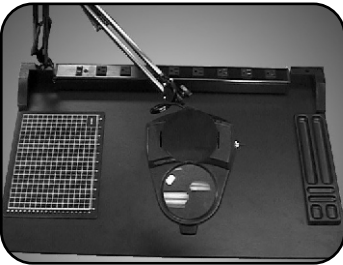

Preformed tubes in virtually every size and style. Quilled for easy insertion in the earmold. Select from standard, Dri, CFA, TRS, Tube-Lock, Libby Horn and practically any combination of the above. Double and single bend available. Also available in DisappEar shades to complement our DisappEar earmolds. Call for prices.

**Listening Stethoscope**

Complete with tubing sections for testing all types of ear level instruments as well as body worn instruments. Available in black, blue or red.

53111-R black \$16.50  
53112-R blue \$16.50  
53113-R red \$16.50

**Porta Lab Workstation**

This multi-function workstation is portable enough to store anywhere, but tough enough for everyday use. Features include flexible magnifier/light, self healing cutting board and a tray for parts and tools. Optional shield also available.

41115-R \$180.00

**MH-100 Mobile Headset Amplifier**

Ideal for anyone with a hearing loss or working in a noisy environment. Voice activated unit easily connects with most headset-ready cellular, mobile and cordless phones. Up to 24 dB amplification.

62427-R \$32.00

**Power One Batteries**

Capable of powering analog as well as high powered digital hearing instruments. More capacity than comparable hearing instrument batteries. Ensures stable voltage even with high output levels. The result is maximum amplification, excellent sound quality and exceptional life span in all types of hearing instruments. Call for prices.

**ClearSounds**

**ClearSounds 40XLC Amplified Phone**

Enables persons with a hearing loss to again speak confidently on the telephone without missing a word. Features include large button, speaker phone, Caller ID, memory storage, maximum volume amplification, UltraClear tone control and a bright strobe ring signaler.

62631-R \$79.95

**ClearSounds CL1 Ring Signaler**

Powerful tone and bright strobe ensure that not another call will be missed because the ringer was not heard. Adjustable volume and tone control; wall mountable. Optional bed shaker also available.

62641-R \$30.00

**ClearSounds WS1 Wake & Shake Alarm Clock**

Extraordinary clock features a choice of loud tones, flashing strobe and vibrating pad. Can also be used as a phone ring signaler. Adjustable volume and tone control; wall mountable.

62626-R \$38.75

**ClearSounds IL40 Amplifier**

Portable amplifier attaches to virtually any corded telephone for better communication wherever it is needed. Compact and easy to connect, with up to 40 dB amplification. Powered by 9V battery.

62621-R \$22.50

**ClearSounds Sound Wizard**

This powerful amplifier offers clearer hearing in a variety of situations. In coordination with the Phone Module, IR Module, and other optional accessories, the basic Sound Wizard II unit will transform muffled sounds into clear reception for clear communication.

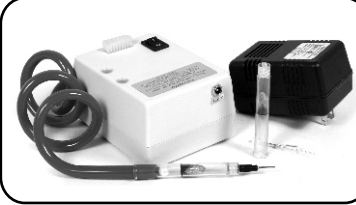

62611-R \$139.95

Includes Phone Module and IR Module

**Jodi XL**

A complete clinical vacuum and desiccator system. Two separate pumps draw moisture out through a needle vacuum and the desiccator. Specially sized needles for different types of hearing instruments and cleaning utensils included. Operates on 12V DC with transformer.

50582-R \$475.00

**Jodi Pro**

Vacuum system for keeping all types of hearing instruments debris and moisture free. Upgraded housing for clinical use. The 2000 hr rated motor operates on 12V DC with transformer.

50581-R \$185.00

**Jodi Consumer**

Similar to the Jodi Pro, but designed for home use. Consumer rated 400 hr. motor should provide 10 - 12 years of operation.

50583-R \$63.50

**The BEST Syringe**

The ultimate in comfort and infection control. Disposable tips guard against infection and the compact design allows ease of use for any size hand. Available in Standard and Kids version. Each BEST Syringe comes with 10 tips. For use only with silicone impression material.

20181-R BEST Syringe Standard \$7.35  
20182-R BEST Syringe Kids \$7.35  
20191-R 50 Replacement Tips \$3.50

**Silicast® Syringe**

For use with Silicast and Silicone Singles. Material flows with less pressure and leaves less waste in the tip.

20131-R \$15.50

**Silicone Singles®**

The most convenient, accurate and unique silicone impression system on the market! Each Silicone Singles package contains exactly enough material for one impression. Simply mix the two pre-measured components. There's no mess, no measuring and no waste. They're as economical as they are easy to use. You can easily carry several Silicone Singles in your briefcase.
